PROFESSIONAL SUMMARY

Final-year B.Tech student in Artificial Intelligence & Data Science who builds things end-to-end, not just prototypes — digging into the data, questioning assumptions, and following a project through to a working, deployed system. Driven by curiosity and a habit of asking "why" until the answer actually holds up. Seeking an opportunity to bring that same curiosity and ownership to a team solving real problems.

EDUCATION

B.Tech – Artificial Intelligence & Data Science | AISSMS IOIT, Pune | 2023–2027 | CGPA: 8.09

TECHNICAL SKILLS

Languages: Python, SQL, C++ (Basics)

AI / ML: DistilBERT, HuggingFace Transformers, Scikit-learn, NLP (TF-IDF, Cosine Similarity), EDA, Time-Series Forecasting

LLM / Agents: LangChain, RAG Systems, FAISS, Multi-Agent Orchestration

MLOps / DevOps: MLflow, DVC, Evidently AI, FastAPI, Docker, GitHub Actions CI/CD, Streamlit

Cloud: AWS Cloud Foundations, AWS Solutions Architecture (Forage)

Data & Viz: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Tableau **Databases:** MySQL, MongoDB

Tools: Jupyter, VS Code, Cursor, Git, GitHub

PROJECTS

Fake News Detection – MLOps Pipeline [\[GitHub\]](#)

Python | DistilBERT | HuggingFace | FastAPI | React 19 | Docker | MLflow | DVC | Evidently AI | GitHub Actions

- Fine-tuned DistilBERT on 42,826 balanced articles for fake news classification; identified and fixed a critical dataset bias where all real-news was sourced from Reuters — retrained the model on content signals rather than source signatures.
- Built a full MLOps pipeline: data ingestion → feature engineering → model training → FastAPI serving → Docker containerisation → React 19 frontend, all wired with GitHub Actions CI/CD.
- Integrated MLflow for experiment tracking across model versions, DVC for data versioning, and Evidently AI for real-time data drift monitoring — a production-ready observability stack.

Sales Analytics Pipeline [\[GitHub\]](#)

Python | SQL | Pandas | Power BI | Time-Series Forecasting

- Engineered an end-to-end pipeline processing 9,800+ sales records — preprocessing, feature engineering, and structured storage in a relational SQL database.
- Built interactive Power BI and HTML dashboards surfacing product-level KPIs and regional revenue trends; implemented time-series forecasting validated with 20 automated unit tests — zero regressions.

CERTIFICATIONS & VIRTUAL INTERNSHIPS

AWS Forage – Solutions Architecture Virtual Internship (Amazon) | Jul 2025

Microsoft – Introduction to Generative AI Concepts | Jul 2025

Microsoft – Fundamentals of Machine Learning | Mar 2025

AWS Academy – Cloud Foundations | Feb 2026

Simplilearn – Applied Data Science with Python | Jul 2025

ACHIEVEMENTS & ACTIVITIES

- Smart India Hackathon 2025 – Represented AISSMS IOIT as part of team Tectonic; competed at the national level against 500+ teams (Sep 2025).
- Volunteer, Jal Dindi Prathisthan NGO, Pune — Led 5 environmental awareness drives (plastic cleansing, water conservation, nature trails); certified by Trustee Rajeev Bhawsar (Feb–Apr 2025).
- Deloitte Cyber Security Job Simulation (Forage) — Hands-on exposure to cybersecurity fundamentals and threat analysis (Jun 2025).
